#### **2008 / ER-BAKIR ELEKTROLİTİK – Work Continuity and Protection from Disaster**

The training led by ER-BAKIR Elektrolitik Copper Products Co. and also joined by other companies within Abaloğlu Holding / Erikoğlu Holding, was realized by Bilge Adam Corporate consultants. During the training, together with issues like business continuity, Strategies for Disaster Protection, policies and procedures needed to be organized within the framework of these strategies, compatibility to BT Standardization structure, technologies that can be employed within the framework of different disaster scenarios and plans that can be applied in accordance with the current situations of the participant firms.

#### **2007 / ER-BAKIR ELEKTROLİTİK COPPER PRODUCTS CO.**

With the participation of ER-BAKIR Elektrolitik Bakir Mamulleri A.Ş. and group companies Dentaş Ambalaj, Erikoğlu Holding, Abaloğlu Holding IT executives, the first part of Business Continuity and Disaster Recovery trainings was realized by Bilge Adam Corporate Server & Storage Unit. During the trainings, Business Continuity Steps, strategy and hardware and software options that can be employed were discussed. Business Continuity projects' steps were enhanced with lab work within the framework of Business Cases. A lot of issues like Disaster Recovery sites, security, back-up, risk analysis were analyzed within the current and planned infrastructure of participant firms and future plans were made with general IT acknowledgements.

#### **2007 / TÜBİTAK MARMARA RESEARCH CENTER**

Prior to Tübitak MRC projects, trainings and consultancy services were given related to the installation and configuration of hardware systems that shall be used within the projects' coverage. Within the framework of these consultancy and training projects, the issues dealt with were, C-Class Blade Systems and the employment of these systems within the project's coverage, the configuration of Server Virtualization architecture compatible with the projects and the central management of the configurations upon their completion.

## Server(Proliant ve Blade) Systems

### REFERENCES

#### 2008 / YAPI KREDİ BANKASI – SQL 2005 CLUSTER Project

SQL Server 2005 Cluster Project planned to increase the continuity and accessibility of the database systems that shall be used in Yapı Kredi Bankası IT infrastructure was realized on W2003 R2 operating systems by Bilge Adam Corporate Consultants. SQL 2005 Cluster system with two nodes was configured by employing HP DL580 Proliant Server systems with a cluster structure carrying sixteen physical CPU cores and also by external data storage units.

#### 2006 / İSKİ (Istanbul Municipality Waterworks)

The project was realized for İSKİ on behalf of Proline. The training for the central management and installation infrastructure of Blade systems positioned in İSKİ infrastructure and the tuning of already set up systems.

#### 2007 / BOYDAK HOLDİNG – BT Services Centralization Project

Within the scope of Boydak Holding BT Services centralization project, Boydak Holding virtual server architecture design, planning and implementation was realized. VMWARE Infrastructure 3, chosen as the virtual server architecture, was positioned on HP C-Class BLADE servers. High accessibility and error tolerance options like Central management, ESX Cluster, DR, HA, vMotion were activated by Virtual Center configuration.

## Data Storage Systems

### REFERENCES

#### 2007 / MARKS & SPENCER

Microsoft SQL Server 2005 Cluster infrastructure was configured whose installation was determined within the scope of Marks & Spencer restructuring process. Within the project, by which high accessibility and performance was targeted through the central operation of Marks & Spencer database applications, Microsoft SQL 2005 Cluster services were configured on 64 bytes architecture by employing HP Itanium servers and HP EVA data storage units.

#### 2007 / MERKEZ ÇELİK

The upgrading of Merkez-Çelik SQL 2000 Cluster structure, together with new server and Data-Storage units' installation and configurations, to SQL Server 2005 Cluster infrastructure was realized. The hardware systems employed are EMC Storage units and HP Server Systems.

#### 2007 / MİGROS

Consultancy service was given during the design of the planned server systems and server virtualization systems that shall be positioned on them prior to the project. The preparation and presentation of concept proof work was realized. Final check-ups were made both during and after the system installations.

#### 2007 / KUMPORT

The upgrading of Kumport SQL 2000 Cluster structure, together with new server and Data-Storage units' installation and configurations, to SQL Server 2005 Cluster infrastructure was realized. The hardware systems employed are EMC Storage units and HP Server Systems.

**REFERENCES****2008 / HP & INTEL Corporate Manageability Solutions Seminars**

With the cooperation of HP – INTEL, seminars organized in Istanbul and Ankara as part of Corporate Manageability Solutions, were successfully performed. Bilge Adam Consultants, whom at the same time were accredited individuals of HP Authorized Training Center and INTEL vPro Activation, presented the participants the integration of vPro, one of the Intel Corporate Platform Solutions, with HP application softwares within the context of the scenarios they had prepared.

**2008 / TURKISH RED CRESCENT– Intel vPro Activation Project**

INTEL - Bilge Adam Corporate vPro activation projects continue with Turkish Red Crescent. The project executed by the cooperation of Intel Turkey and Bilge Adam Corporate was realized in two stages. The first stage of the project was completed by realizing the training activities and in the second stage, Intel vPro activation activities were carried out in the structure of Turkish Red Crescent. In this project where the purpose was to manage centrally the client systems having Intel vPro platform, more efficiently, more cost-effectively and more secure, vPro management was provided with Microsoft SMS Server 2003 integration that has been in use in the infrastructure of Turkish Red Crescent. The desktop and laptop client systems activated during the project realized at Turkish Red Crescent , are used with vPro and CentrinoPro drives. Bilge Adam Corporate is one of the two Intel Vpro Activation Centers in Europe.

**2008 / TURKISH PRIME MINISTRY UNDERSECRETARIAT OF CUSTOMS – Intel vPro Activation Project**

INTEL - Bilge Adam Corporate vPro activation projects continue with the Undersecretariat of Customs. The project executed by the cooperation of Intel Turkey and Bilge Adam Corporate, was realized in two stages. The first stage of the project was completed by the training and workshop activities realized in an isolated environment and in the second stage, Intel vPro activities were carried out in the structure of the Undersecretariat of Customs. In this project where the purpose was to manage centrally the client systems having Intel vPro platform, more efficiently, more cost-effectively and more secure, vPro management was provided with Microsoft SMS Server 2003 integration that has been in use in the infrastructure of Turkish Red Crescent. HP DC7800 devices activated during the project realized at the Undersecretariat of Customs are used with the new vPro drive weybridge. After the AVERILL drive activation, the first activation of WEYBRIDGE drive vPro's in Turkey was realized at the Undersecretariat of Customs.

**2008 / ASELSAN – Intel vPro Activation Project**

The first Intel vPro Activation Project was completed successfully at Aselsan. The project executed by the cooperation of Intel Turkey and Bilge Adam Corporate, was realized in two stages. The first stage of the project was completed by the training and workshop activities realized in an isolated environment and in the second stage, Intel vPro activities were carried out in the structure of Aselsan. In this project where the purpose was to manage centrally the client systems having Intel vPro platform, more efficiently, more cost-effectively and more secure, vPro management was provided with Microsoft SMS Server 2007 integration that has been in use in the infrastructure of Aselsan. Bilge Adam Corporate is one of the two Intel Vpro Activation Centers in Europe.
